/ Vacancy: Business, Technology & Innovation internship

From: Bax & Company
Location: Barcelona, Spain
Open position: Continuously looking for interns

The company

Bax & Company is a consultancy firm specialized in innovation management, supporting clients across Europe in transforming science and technology into real value. We work for the three type of innovation actors, including industry (large corporations, high-tech smaller companies), academia (universities, RTos) as well as for public authorities. We support our clients by combining our knowledge, experience, methodology and network with a powerful drive to turn vision into tangible strategies and projects in the complex world of partnering, emerging technologies, new market opportunities and shifting policy frameworks.

We are specialized in different high-tech areas related to global societal challenges¹ allowing us to assess our clients at more strategic level. Within those focused areas, we deliver a broad portfolio of consulting services² spanning all stages of the innovation lifecycle, from mobilizing resources to develop (collaborative) R&D activities, to managing and supporting the commercialization of innovative products.

The position

Bax & Company is currently seeking candidates for an Internship position for our mobility, materials and Industry 4.0 team. We are looking for people who are close to graduation, ideally for whom an internship forms part of the curriculum.

As an Intern, you will be supporting B&C consultants with client-facing assignments involving R&D project management, innovation collaborations, creation of new Open Innovation initiatives, and provision of support for clients’ business development activities.

We expect you to participate in at least two or three different assignments that may cover substantially different fields. We do not formally require you have a strong background in particular fields, but we expect that you will work to the utmost of your ability to quickly adapt and learn about them.

Your activities will include working closely with one or two other B&C consultants, as well as with clients and other parties that B&C collaborates with in its assignments.

You will perform your activities from our headquarters office in Barcelona.

The candidates we are seeking

We seek ambitious fast-learning candidates that have affinity with technology, business and innovation and the strong ambition for a fast professional growth in a small and highly specialized consultancy firm.

- **Background and profile:** a MSc in engineering or Industrial Design is required. We look for profiles reflecting specific interest in the mix between business and technology, ideally with additional education in business and innovation management.

- **Languages:** truly fluent English, both written and oral, is essential (almost all of our assignments are performed in English). Additionally, we value fluency in our client native languages such as Spanish, Dutch, German and French.

- **Writing skills:** good writing skills are essential; we need you to enjoy and be good at creating convincing argumentations, easily translating complex technical concepts into clear and compelling business language.

- **Soft skills:** we expect a great deal of autonomy and pro-activity, being able to communicate professionally with partners and clients, managing and leading discussions and public presentations.

To apply for this position, please submit your résumé and a specific cover letter to Encarni Torres via recruitment@baxcompany.com. Interviews will be conducted upon receipt of relevant profiles – we therefore encourage you to apply without delay.
