Start your career at CENTOGENE

CENTOGENE AG is a global leader in the field of genetic diagnostics for hereditary diseases. The international certified (CAP/CLIA/ISO) company is a globally operating biotechnology company with headquarters in Rostock and Berlin and international offices (Dubai, Delhi, Vienna, Boston, etc.).

CENTOGENE is supported by the application of cutting-edge technologies (whole exome/genome sequencing, large organ-specific panels, innovative biomarkers based on high-end mass-spectrometry) and is constantly developing new innovative products in the field of genetics. The analysis of samples from more than 115 countries as well as our IT-based (big data, artificial intelligence), molecular knowledge is the basis for the constantly development of the largest mutation database for hereditary diseases (CentoMD®). CENTOGENE is also an strong international partner for multiple renowned pharmaceutical companies in the orphan drug market.

Due to our constant growth we are looking to enlarge our team in Rostock. Therefore we are seeking for a:
