To support our team, we are looking for a

**Working Student Data Warehouse**

### Your role

- As part of the data team, you will be co-responsible for further developing our data warehouse and visualizing business processes.
- Gradually, you will assume responsibility for creating SQL queries to the data warehouse and for the compilation of reports based on requirements.
- You will support the development of dashboards for data visualization while using Apache Superset.
- Depending on your interests and skills, you will be assigned further tasks which will come as a result of our growth and development.

### Your profile

- You are currently enrolled in technical or natural science studies at a college or university (business informatics, computer sciences ...)
- You have a keen interest in anything to do with tech and digital
- You already have some work experience and extensive knowledge of SQL, ideally also of PostgreSQL
- You are looking for a long-term working student position (at least 6 months) where you can work >15 hours per week
- You are conversant in English

### Sounds like an interesting challenge for you?

We believe in culture first, skills second: If you are truly interested in this job, you should apply - even if you do not fulfill 100% of the requirements. Because a cultural fit is more important to us than an extra grain of qualification.

Send us your profile to joinus@gohiring.com. For questions you can always contact Uta Sommer. We look forward to getting to know you better!

This job is not for you, but you have someone in mind ... ? Simply forward the link to this page to her/him.
