Company description:
SAP is the world leader in enterprise applications in terms of software and software-related service revenue. Based on market capitalization, we are the world’s third largest independent software manufacturer. Browse company facts and information below.

Job description:
Requisition ID: 163244
Work Area: Software-Design and Development
Location: Walldorf/St. Leon-Rot
Expected Travel: 0 - 10%
Career Status: Early Talent
Employment Type: Regular Full Time

COMPANY DESCRIPTION
SAP’s vision is to help the world run better and improve people’s lives. As the cloud company powered by SAP HANA®, SAP is a market leader in enterprise application software, helping companies of all sizes and industries run better. SAP empowers people and organizations to work together more efficiently and use business insight more effectively. SAP applications and services enable our customers to operate profitably, adapt continuously, and grow sustainably. At SAP, we believe in the power of collaboration and empower our employees to perform at their best in an environment that encourages free and open expression of ideas. You’ll work alongside creative thinkers who share your interests, while turning big ideas into reality for our customers. With innovative job training, mentors to help you grow, and the flexibility to balance your work and personal life, you’ll be able to get more out of your career. It’s no wonder that some of the sharpest minds from around the world are working for a company that is consistently recognized as a global top employer. Now it’s your turn to take the next step and help make the world Run Simple.

PURPOSE AND OBJECTIVES
To provide users of software in a global market with texts in their own language, translations are required. SAP Translation Hub (STH) enables users to translate texts by using a range of Web services to access records in a multilingual database and by using machine translation. We are looking for a highly-motivated (Junior) Developer associate who supports our team with various software development tasks for client- and server-side components that run on the SAP Cloud Platform (SCP).

EXPECTATIONS AND TASKS
You should be eager to:

- Develop robust and understandable software
- Document, automatically test and deploy the software
- Interact with the various stakeholders
- Learn, contribute, improve, innovate

You will get the chance to gain or improve your expertise in:

- Development on the SAP Cloud Platform
- Supporting productive software and customers
- Working in a team that uses agile development methods and Continuous Integration
- Translation processes and tools
EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

Required:

University degree (Master preferred) in Computer Science, Computational Linguistics with technical focus, or related fields
Excellent proven programming skills in JavaScript (client- and server-side) and Java
A demonstrated interested in focusing on practical implementations and engineering solutions
Flexible team player with excellent interpersonal skills. Ability to efficiently master complex processes and concepts to cope with challenging requirements. Very organized with high attention to detail. Ability to prioritize and work on multiple tasks
Good written and verbal communication skills in English and German

Preferably you bring along knowledge/skills in one or more of the following areas:

Experience with SAP HANA and application development on the SAP Cloud Platform. SAP HANA performance experience would be an advantage
Experience with Selenium and HTML5. SAPUI5 and XSJS would be advantages
Experience with Spring and Spring Boot
Experience with SAML and generic Security understanding
Experience with multi-threaded and clustered or distributed environments.
Experience with agile development, continuous delivery, DevOps and quality engineering.
Good understanding of software testing concepts and methods for example experience with Java unit tests
Profound DB design and implementation experience (SQL). Good knowledge in latest database advances
Solid knowledge about web service technologies. Experience with integrating components of different programming languages (for example Java Native Interface (JNI), Web Services (WS), ...)
Knowledge about machine translation and machine learning in general

WORK EXPERIENCE

This is an entry-level role for recent or upcoming graduates with 0-2 years of work experience.

SAP’S DIVERSITY COMMITMENT

To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company.
SAP is committed to the principles of Equal Employment Opportunity and to providing reasonable accommodations to applicants with physical, sensory and/or mental disabilities. If you are interested in applying for employment with SAP and are in need of accommodation or special assistance to navigate our website or to complete your application, please contact us at Careers.Germany@sap.com. Requests for reasonable accommodation will be considered on a case-by-case basis.
