Our Engineers are responsible for inventing, developing, reapplying and delivering breakthrough processes and packing technologies that provide winning products for consumers around the world. Looking after a multitude of current and future products, Procter & Gamble Engineers have the technical curiosity and knowledge to develop new approaches to big challenges. Your work will require creativity, innovation, teamwork and leadership. You will use state of the art technologies with multi-disciplinary and highly professional teams across the Company and work seamlessly with R&D and Manufacturing.

We are looking for Process Engineers for our locations of Marktheidenfeld, Walldürn, Kronberg, Crailsheim and Worms.

Job Requirements:

- Good academic results in engineering disciplines such as: Engineering, Mechanical Engineering, Industrial Engineering, Mechatronics, Automation Technology, Process Engineering, Polymer Technology, Informatics, Electronical Engineering.
- Ideally at least one engineering internship experience and up to 4 years work experience.
- Strong leadership skills
- Ability to work effectively with others
- Fluency in English and in German
- Evidence of passion and achievements in academic and/or non-academic activities
- Social engagement is considered as a plus

We offer:

- Training-on-the-Job
- Job-Rotation
- Challenges and significant responsibility from day 1
- Truly international working environment
- Excellent career perspectives
- Attractive salary and social benefits
- Opportunities for young professionals and those starting their career directly from university

Did you know that P&G has been awarded Great Place to Work in Germany in 2018? To learn more about P&G and its technical career opportunities, click here to watch a Q&A with two of their own Process Engineers.
