- Creation of documents as basis for production and installation of ventilation and air conditioning systems
- Co-ordination (2D/3D) of systems and single components inside ship structures
- Ensuring of technical commercial parameters according to clients requirement
- Elaborating of specifications, check and evaluate of quotations
- Technical discussion with owners, classification societies, shipyards, suppliers
- Support for development of LNG- vessels
- Refit projects, check and adaption of ventilation and air conditioning systems
- Participation in research project
- Creation of representative documents, e.g. calculation sheets, fan power table, diagrams, over view drawings, work-shop drawings, arrangement drawings

**Your profile**
- Bachelor’s or Master’s degree in the field of ventilation and air conditioning engineering and at last 2 years’ experience
- Advanced skills in AutoCAD and willingness to learn new 3D-CAD-Software
- Good communication skills: Very good English skills. German skills are an asset
- Ability to work both independently and with a team
- An interest in maritime innovation and an open mindset to new development and technologies

**Our offer**
- A professional working environment in an attractive workplace with highly qualified employees
- A decent wage
- Flexible working hours
- Regular team events
