Job advertisement for Clinical Research Associates

CENTOGENE is a rare disease company (main quarter in Rostock, Germany) focused on transforming clinical, genetic, and biochemical data into medical solutions. The clinical study department is conducting epidemiological, observational, non-interventional studies worldwide. Our main goal is to investigate the prevalence of rare genetic diseases and to establish disease-specific biomarkers globally.

Your responsibilities

- Execution of worldwide epidemiological, observational, non-interventional studies
- Preparing documents within regulatory and legal frameworks and delivering them within timelines and required quality standards
- Ensure legal and ethical compliance of documents within strict regulatory requirements
- Direct communication with study sites
- Study site visits
- Generating interim/final reports

Your profile

- PhD in Life sciences
- Ability to inquire rapidly new scientific topics
- Well organized and detail oriented
- Strong communication skills
- Excellent communicator and presenter (oral and written), ability to communicate to Senior Leaders/Stakeholders internally and externally
- Proven ability to work independently with minimal supervision
- Strong strategic thinking
- Willingness to frequent travels
- Microsoft Office skills
- Fluent in both written and spoken English, further language skills are beneficial

What we can offer

- A position in an international company
- Working in a friendly, open-minded, and enthusiastic team
- Very good possibilities for development
- Assistance with finding apartments

We offer a full-time job at the earliest possible start date (ideally March-April 2019). Please send your application including a cover letter, your CV, and relevant certificates to:
