

The Faculty of Mathematics and Natural Sciences at the University of Rostock invites applications for a

W1-Professorship in Chemical Engineering
(with a tenure track for a W3 professorship)

at the Institute of Chemistry, at the earliest possible date (within budget considerations).

The future holder of the position should be able to teach the subject of Chemical Engineering within the Chemistry, Economical Chemistry and Teaching degree programs in German and English language, including the theoretical foundations in lectures and exercises as well as supervision of practical courses. Participation in the further development of the degree programs is expected.

The research focus of the future post holder should be on a current field of chemical engineering. A particular focus should be on research topics in the field of catalysis or materials science. Possible areas of application are in the fields of sustainable technical processes, the development and use of innovative materials and their applications or integrated processes. Experience in the acquisition and implementation of third-party funded projects is desirable. She*he should complement the research fields of the Institute of Chemistry and the associated non-university research institutions in Rostock. In particular, cooperation in the main research areas of the Interdisciplinary Faculty is expected.

For further inquiries, please contact:

Prof. Dr. Björn Corzilius, chair of appointments committee

Qualifications are as per § 62 (1) of the Higher Education Act of the State of Mecklenburg-Vorpommern (LHG M-V). So far as there has been a period of employment as a member of scientific staff or as a scientific assistant in Germany, before or after completion of the doctorate, it is required that the doctorate period and the employment period combined have not exceeded nine years.

The professorship is to be filled according to § 62 (2) LHG M-V as a position with civil servant status of time or as a regular state employee. The employment relationship is extended for a further three years in the event of probation as part of an interim evaluation after the third year. Pursuant to § 62a LHG M-V, the appointment to the junior professorship is linked to the promise that a professorship in the civil service status for life or as a regular state employee will be accepted if the individual defined performance requirements are met during the junior professorship. Before the end of the second phase of the junior professorship, a tenure track evaluation is carried out in order to check the prerequisites for taking on the permanent W3 professorship.

A special focus is placed on academic achievement and teaching qualifications as well academic organization and administration. For this reason, candidates should describe previous teaching results, ideas regarding future teaching (including didactic lesson planning) and their prior experience in academic and scientific management. In addition, candidates are expected to have experience and interest in developing programs that can attract and maintain external funding.

The University of Rostock is committed to their university management guidelines.

Equal opportunities are part of our personnel policy. The announcement is therefore aimed at all persons regardless of their gender. Disabled applicants will be given preference if all other qualifications are essentially equal.

The University of Rostock is especially interested in promoting women within the context of § 7 (3) of the Gender Equality Act, and therefore specifically encourages applications from qualified women. Women will be given priority if their qualifications are essentially equivalent, unless reasons attributable to the person of the competitor predominate.

Applications with the usual documents (full CV, a complete list of academic and professional background, publications, teaching experience, certificates, any additional qualifications, a summary of grants and sponsored research activities and a description of future research plans) should be sent **no later than April 25th, 2025** to the **Universität Rostock, Dekan der Mathematisch-Naturwissenschaftlichen Fakultät, Wismarsche Straße 45, 18057 Rostock** or by e-mail to dekan.mnf@uni-rostock.de. We would like to point out that your e-mail will be sent to us unencrypted.

The protection of your personal information is very important to us. Therefore, the data collected during the application process will be collected, processed and used in accordance with the relevant data protection rules.

Application costs cannot be reimbursed by the State of Mecklenburg-Vorpommern. We ask you to submit applications only in copy, as they will not be returned after the procedure has been completed.
