

Table of Contents

1	Preface	5
2	Ramunas Adamonis Low Power Algorithm for Shoe Mounted Inertial Navigation System	7
3	Gintarė Sukarevičienė and Karolis Žvinys Femtocell deployment: in search of viable Business Models	21
4	Omar Reyad and Zbigniew Kotulski Pseudo-random Number Generators Based on Multiplicative Elliptic Curves	33
5	Robin Nicolay and Clemens H. Cap Information Delivery Optimization in a Lecture	43
6	Dmytro Piatkivskyi and Slobodan Petrovic Optimizing session-based HTTP flood detection	49
7	Benjamin Leiding, Jonas Vetterick and Clemens H. Cap Exploring Classroom Response Systems in Practical Scenarios	63
8	André Sandmann, Andreas Ahrens and Steffen Lochmann Zero-Forcing Equalisation of Estimated Optical MIMO Channels	73
9	Ahmed Mamdouh El-Shafiey, Francisco Cano-Broncano and Andreas Ahrens Resource Allocation Strategies in SVD-equalized Broadband MIMO Systems	87
10	Susanne Schumacher, Andreas Ahrens and César Benavente-Peces Optimal Detection in non-orthogonal CDMA-based Multiuser Transmission Schemes	99

- 11 Jan Pawlowski and Adewale Ademowo
**Analysis of Social Network Success Factors for
International Collaboration** 105
- 12 Zuzana Joniaková, Jana Blštáková and Michaela Vogl
**Human resource management in Slovak organizations in
the context of contemporary tendencies – two decades in
market economy** 123
