

## Working Student Product Development (m/f/d)

### About Us

**Arcensus** is a digital health and genetics biotech company specializing in the clinical interpretation of large datasets obtained from Whole Genome Sequencing (WGS) and Whole Exome sequencing (WES) for patients worldwide. Leveraging its extensive big data insights, Arcensus identifies the etiology of hereditary symptoms, recommends improved treatment options, and assists in implementing preventative measures for a healthier and extended lifespan.

We are constantly developing new data-driven products to broaden insights that can be obtained from genetic data. To support our **Product Development** team in Rostock, we are looking for a **Working Student (m/f/d)** with immediate availability.

### Your qualifications

- Enrolled student at the University of Rostock, preferably in the fields of Biology, Biotechnology or similar
- Eager and quick in understanding biological data and databases
- Proficiency in Microsoft Office (Outlook, Excel, PowerPoint, etc.)
- Open-minded and keen to work in a multicultural multidisciplinary team
- Very good command of English (C1)
- Good communications skills

### Your tasks

- Support the product development and Bioinformatics team to extract information about variants from literature and public databases
- Structuring information into databases related to nutrigenetics, pharmacogenetics, etc. Previous experience in these disciplines is not required.

### Your benefits

- Free time management
- Fair remuneration
- Access to company-shared benefits like E-Scooter, Bikes, Team Events, warm and cold beverages
- Flat hierarchies

**Does this sound like you? Then let's go! We can't wait to get to know you.**

Please apply with your CV and earliest possible starting date by email to [hr@arcensus-diagnostics.com](mailto:hr@arcensus-diagnostics.com).
