Start your career at CENTOGENE

We are the experts in rare hereditary diseases. We know the genetic basis and the clinical phenotype of genetic disorders inside-out. Our platform is based on the world’s largest curated mutation database for rare diseases. We have an unrivaled global diagnostic footprint, and an unmatched ability to derive diagnostic solutions to accurately identify rare disease patients and accelerate the path to approval for new orphan drugs.

How do we do this? By bringing together more than 350 individuals from 45 different countries to transform clinical and genetic data into medical solutions for patients. We work together at our HQ in Rostock, Germany, and also at additional offices in Berlin and laboratory facilities in Cambridge MA. Our employees - medical experts, scientists, IT professionals, bioinformaticians, technicians, researchers, project managers, and many more - are all passionate about one thing: improving the lives of our patients.

Does this sound like you? If it does, we’d love to hear from you.

As of now we are looking for a student who will support our IT Team for a short time as:
